

CATV IN THE BAY AREA

A SURVEY

This survey was designed to obtain basic information on service programs by Cable Television companies. There are numerous Cable TV outfits which are now servicing almost every city throughout the nine county San Francisco Bay Region. Many of these companies are presently engaged in local origination programming which provides entertainment and community service programs for their subscribers. Many more Cable TV outfits are planning to start broadcasting local programs in the near future. This new form of community media will make available an avenue in which the dissemination of diverse public interest material can be initiated by citizens, service organizations, local governments and regional agencies. The purpose of this Cable TV Director is to make citizens and officials in the Bay Area aware of the availability of this type of communication and to provide them with an informative guide to Cable TV programming, producing, personnel, and equipment in their area.
